

Dear FCC Commissioners & Staff:

I don't understand how your proposed rule changes would benefit the American people in the long term.

Given that the economic size of the Baby Bells exceeds that of most (all?) independent ISPs, doing away with the access requirement is tantamount to doing away with independent ISPs. I understand very clearly how this benefits the Baby Bells, but I don't understand how does this benefit Americans.

Therefore, I am against this rule change and I urge you not to implement it.

Thank you.

Sincerely,

Vladimir G. Ivanovic
